

LARP MEDTECH ALLIANCE

**INTEGRATED PROSTHETICS,
ORTHOTICS, REHABILITATION &
AI MEDICAL SOLUTIONS PLATFORM**

EXECUTIVE MESSAGE

LARP MedTech Alliance was established to answer a growing and urgent need across the Middle East and emerging markets: the need for a unified, accountable, and future-ready platform capable of delivering advanced prosthetics, orthotics, rehabilitation, and AI-driven medical solutions at scale.

Across governments, hospitals, humanitarian organizations, and private healthcare providers, the challenges are consistent—fragmented supply chains, long patient wait times, dependence on overseas manufacturing, limited local capacity, and rising demand driven by population growth, conflict-related injuries, and chronic health conditions.

LARP was created to bridge these gaps. Through a carefully structured alliance of execution, strategy, and technical expertise, we provide an end-to-end medical technology platform that is scalable, compliant, and aligned with national healthcare visions.

EXECUTIVE SUMMARY

LARP MedTech Alliance is an integrated medical technology platform delivering A–Z solutions in prosthetics, orthotics, rehabilitation, and AI-enabled medical systems.

The Alliance brings together:

- Centralized execution and governance
- Advanced technical and clinical expertise
- Strategic structuring and market intelligence
- Phased localization and manufacturing

Our model enables governments and institutions to rapidly deploy high-quality services today while building sustainable national capabilities for tomorrow.

THE CHALLENGE WE ADDRESS

Healthcare systems across the region face multiple structural challenges:

- Fragmented prosthetics and rehabilitation ecosystems
- Heavy reliance on overseas suppliers
- Long lead times for patient delivery
- Limited local manufacturing and technical workforce
- Rising humanitarian and post-conflict demand
- Increasing expectations for compliance, transparency, and outcomes

These challenges require more than suppliers or clinics. They require integrated platforms capable of execution, accountability, and long-term capacity building.

THE LARP SOLUTION: AN A-Z PLATFORM

LARP operates as a fully integrated medical technology platform covering the entire patient and institutional journey:

- Patient intake and assessment
- Clinical and technical evaluation
- Digital design and customization
- Manufacturing and assembly
- Fitting and delivery
- Rehabilitation and training
- Long-term follow-up and maintenance

This single-platform approach ensures efficiency, accountability, and consistent quality across all stages.

VISION, MISSION & VALUES

Vision

To become the leading regional platform for advanced prosthetics, rehabilitation, and AI medical solutions, empowering individuals and strengthening national healthcare systems.

Mission

To deliver integrated, scalable, and compliant medical technology solutions while enabling phased localization, workforce development, and sustainable manufacturing.

Values

- Patient dignity and outcomes
- Accountability and governance
- Innovation with purpose
- Partnership and collaboration

Sustainability and localization

GOVERNANCE & ALLIANCE STRUCTURE

LARP MedTech Alliance operates under a structured governance model that ensures clarity of roles, accountability, and unified execution.

The Alliance is designed to prevent fragmentation, parallel routes, or unmanaged commitments. All activities are aligned under a centralized execution framework, allowing governments and partners to engage with one accountable platform.

PARTNER MIX & FUNCTIONAL ROLES

LARP's strength lies in its structured partner mix, where each entity contributes within a clearly defined functional scope:

- American International LLC (USA) – Managing Partner responsible for governance, commercial execution, and global compliance
- American International United (KSA) – Regional execution platform and MENA interface
- L.A.Y.S Global Trading (Canada) – Strategic consulting partner providing market intelligence, structuring, and phased localization planning
- Pioneers (Kuwait) – Technical partner delivering prosthetics and orthotics expertise
- RMC (Kuwait) – Support services partner
- Mr. Rene Eid – MENA Consultant Manager
- Ms. Maha Almerabi – MENA PR Consultant Manager

All partners operate under the LARP governance framework.

WHY THIS PARTNER MIX WORKS

By separating strategy, execution, and technical delivery, LARP minimizes operational risk and maximizes efficiency.

This structure allows governments and institutions to engage with one unified platform while benefiting from best-in-class expertise across domains.

TECHNICAL & COMMERCIAL CAPABILITIES

LARP delivers a comprehensive range of solutions including:

1 Upper and lower limb prosthetics

2 Cosmetic silicone prostheses

3 Bionic and microprocessor-controlled systems

4 Pediatric and complex cases

5 Orthotic systems

6 Raw material supply

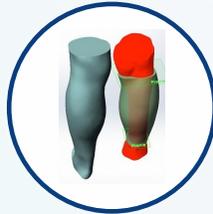

7 Ready-made prosthetic and orthotic product sales

ADVANCED TECHNOLOGY & AI SOLUTIONS

LARP integrates advanced technologies across its operations:

1 CAD/CAM and digital design

2 3D scanning and modeling

3 AI-assisted design optimization

4 AI medical diagnostic solutions

5 Robotics-assisted manufacturing

6 3D printing technologies

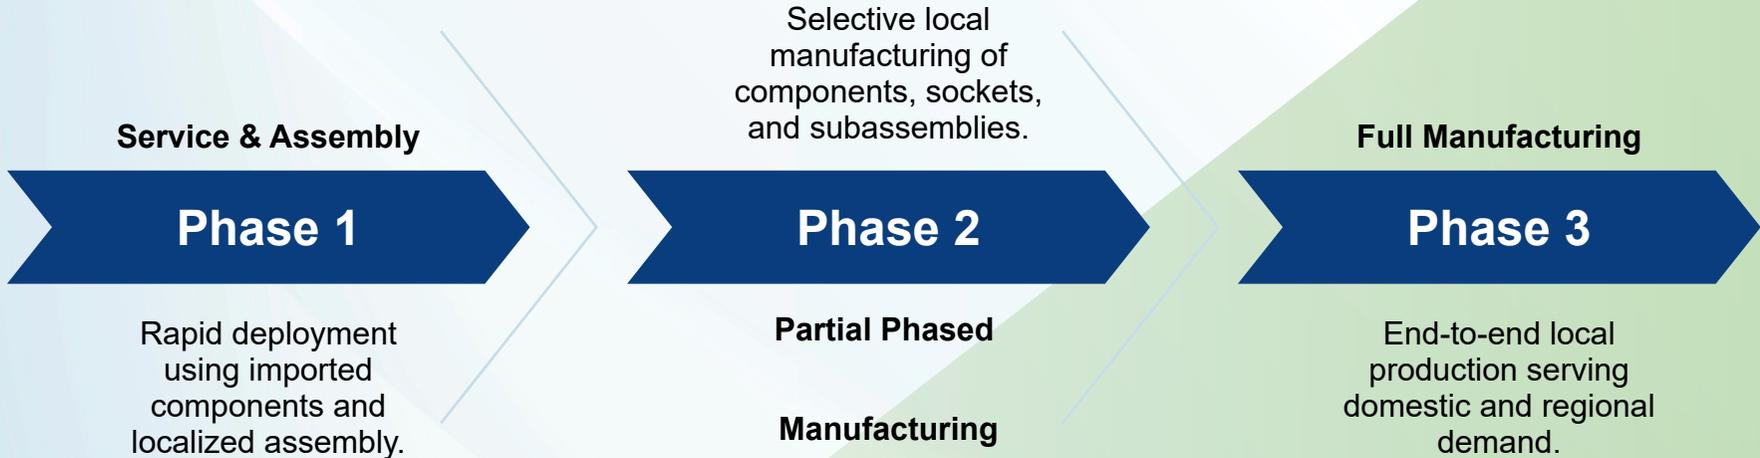

These capabilities enhance accuracy, speed, and patient outcomes.

PATIENT CARE & REHABILITATION MODEL

Our multidisciplinary care model integrates clinicians, engineers, rehabilitation specialists, and AI-driven monitoring to ensure long-term success and patient satisfaction.

PHASED LOCALIZATION & MANUFACTURING

OUR MODELS

HUMAN CAPITAL & TRAINING

LARP prioritizes workforce development through training programs, academic partnerships, and structured knowledge transfer.

GOVERNMENT & MOH ENGAGEMENT MODEL

LARP supports ministries of health through turnkey P&O centers, national disability programs, and long-term capability building.

NGO & HUMANITARIAN OPERATIONS

We provide compliant, auditable solutions for donor-funded and humanitarian programs, ensuring transparency and speed of delivery.

PRIVATE SECTOR & HOSPITAL PARTNERSHIPS

Flexible operational and revenue-sharing models allow hospitals and clinics to integrate advanced services without excessive risk.

COMPLIANCE & RISK MANAGEMENT

LARP maintains strict compliance across procurement, AML/KYC, data protection, and quality standards.

REGIONAL FOOTPRINT & GROWTH

UAE (2017)

Kuwait (2019)

KSA (2025)

Syria (2025)

Jordan (2026)

Planned MENA growth includes
Qatar, Oman, and Bahrain.

IMPACT METRICS

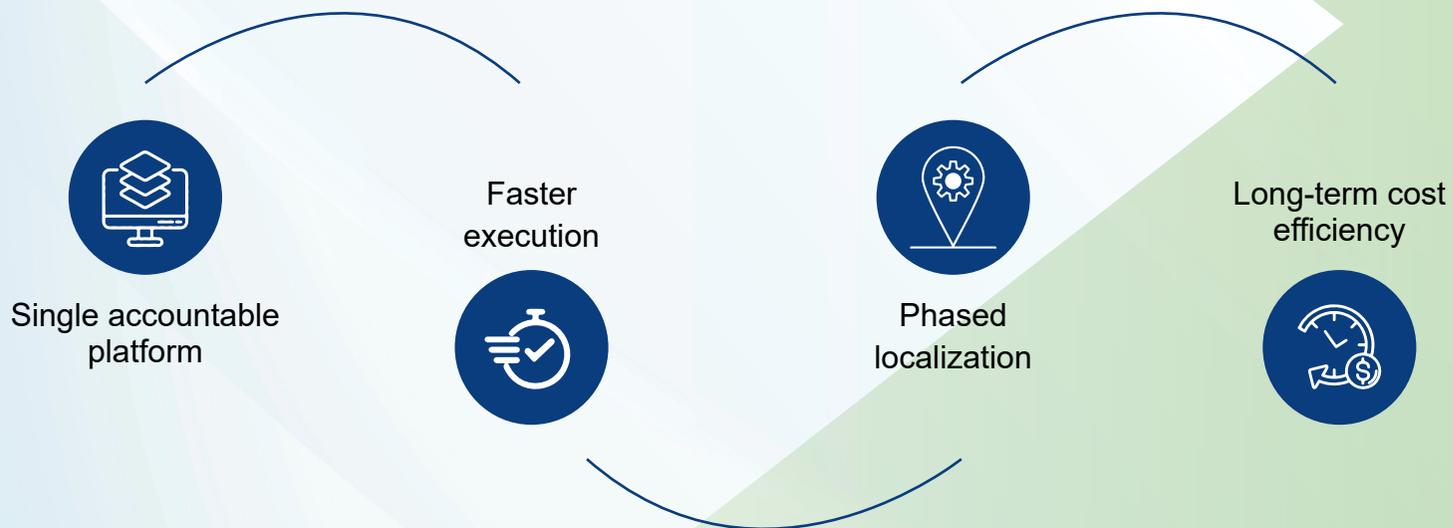

LARP measures success through patient outcomes, workforce development, delivery timelines, and system sustainability.

CASE FLOW & OPERATIONAL CONTROL

All cases follow a structured pathway from intake to long-term follow-up under centralized oversight.

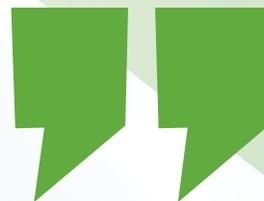

WHY GOVERNMENTS CHOOSE LARP

FUTURE ROADMAP

CLOSING STATEMENT

LARP MedTech Alliance represents a shift from fragmented service delivery to integrated national capability.
